Peer common based production of scientific knowledge

Collaboration: Participation + Interaction + Diversity

Public Communication of Science

Utilizando medios tradicionales y nuevos formatos como blogs, video juegos, hackatones, etc.

Public Communication Intervention

Evaluation and Publication

Documentation and Description

Research Design and Proposals

Recoleccion and Analysis

Instrumental Infrastructure

Citizen Science

Actores sociales participan en la recolección, clasificación y análisis del conocimiento científico.

Scientific Online Collaboration

Nuevas herramientas digitales facilitan la interacción y la producción colectiva usando Internet.

Open Digital Repository

Permiten acceder libremente a datos y publicaciones científicas.

Benefits of Open Science

Improving Knowledge Production
Democratization
Empowerment

Efficiency
Quality
Creativity

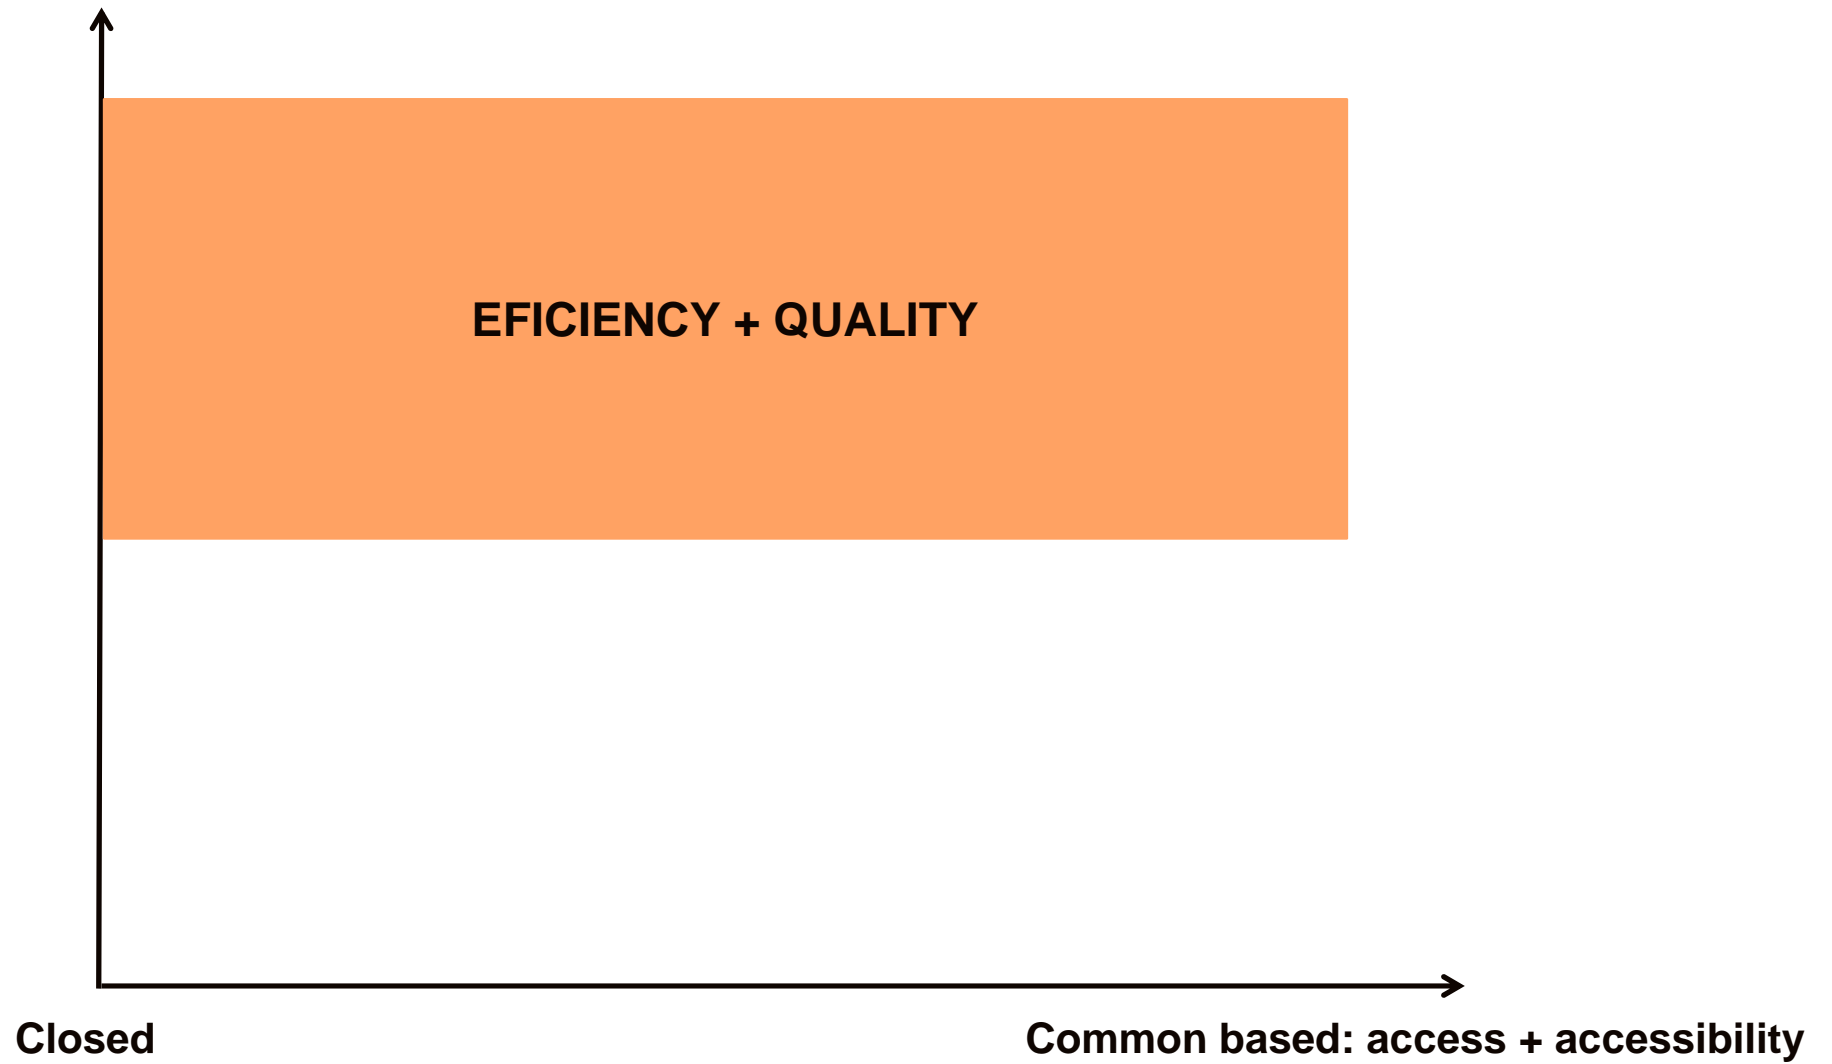

Objectives of the Work

- 1. Producing an analytical framework relating the different dimensions of openness with benefits**
- 2. Anticipating the obstacles actors face when attempting to opening up**

Forms of Collaboration Production of Scientific Knowledge

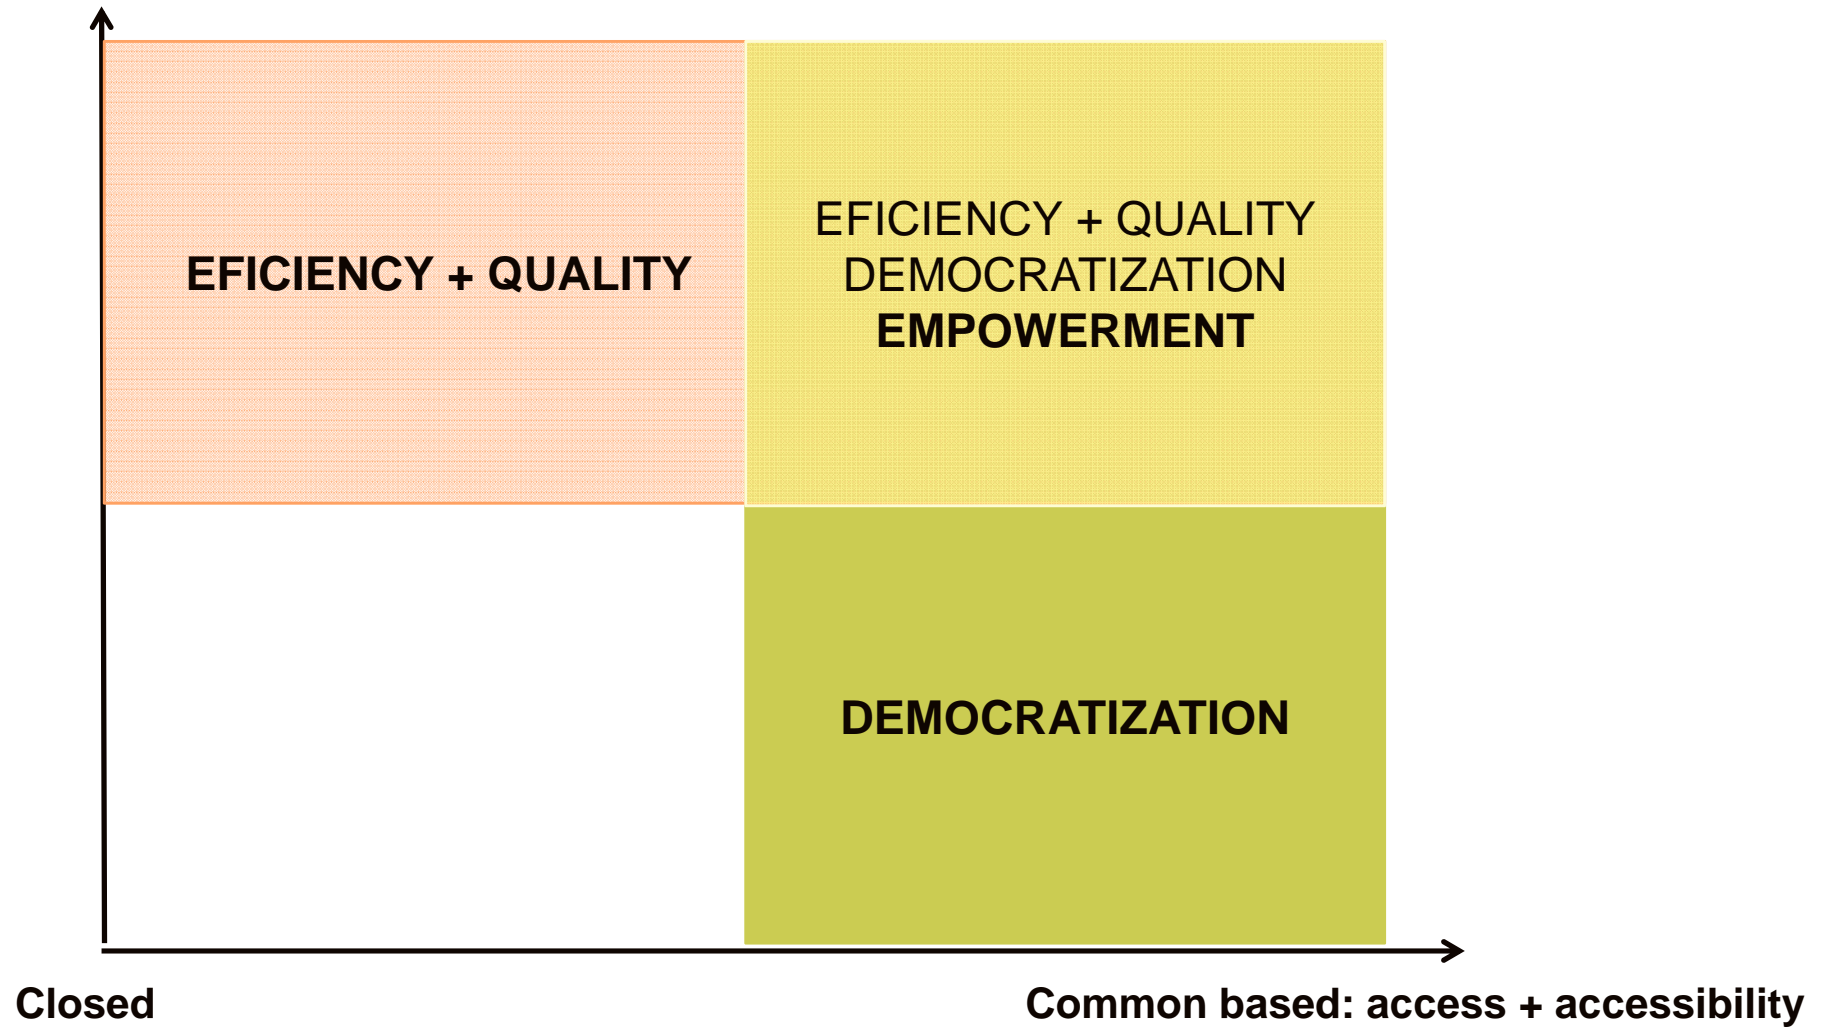

Collaboration: Participation + Interaction + Diversity

Collaboration: Participation + Interaction + Diversity

Collaboration: Participation + Interaction + Diversity

Collaboration: Participation + Interaction + Diversity

Methodology: Case Studies

- Selection Criteria
 - Disciplines, processes of knowledge production, techniques of participation, new infrastructure
- 4 Cases:
 - NOVA (astronomy)
 - PAMPA2 (limnology)
 - eBird (ornithology)
 - Territorial Intelligence (geography – chemistry)
- At least 3 semi-structured interviews per case
- Structured interview with project leader to assess openness in a 4-point Likert scale (dimensions+stages)

PAMPA2: Lakes as sentinels

Argentinean Project of Monitoring and Prospecting the Aquatic Environment

Multidisciplinary team

Water behavior in the face of natural or human events

Sensors in buoys (Prize Innovar 2011)
Open data

SAFER: Monitoring with the community

Sensing the Americas' Freshwater Ecosystem Risk from Climate Change

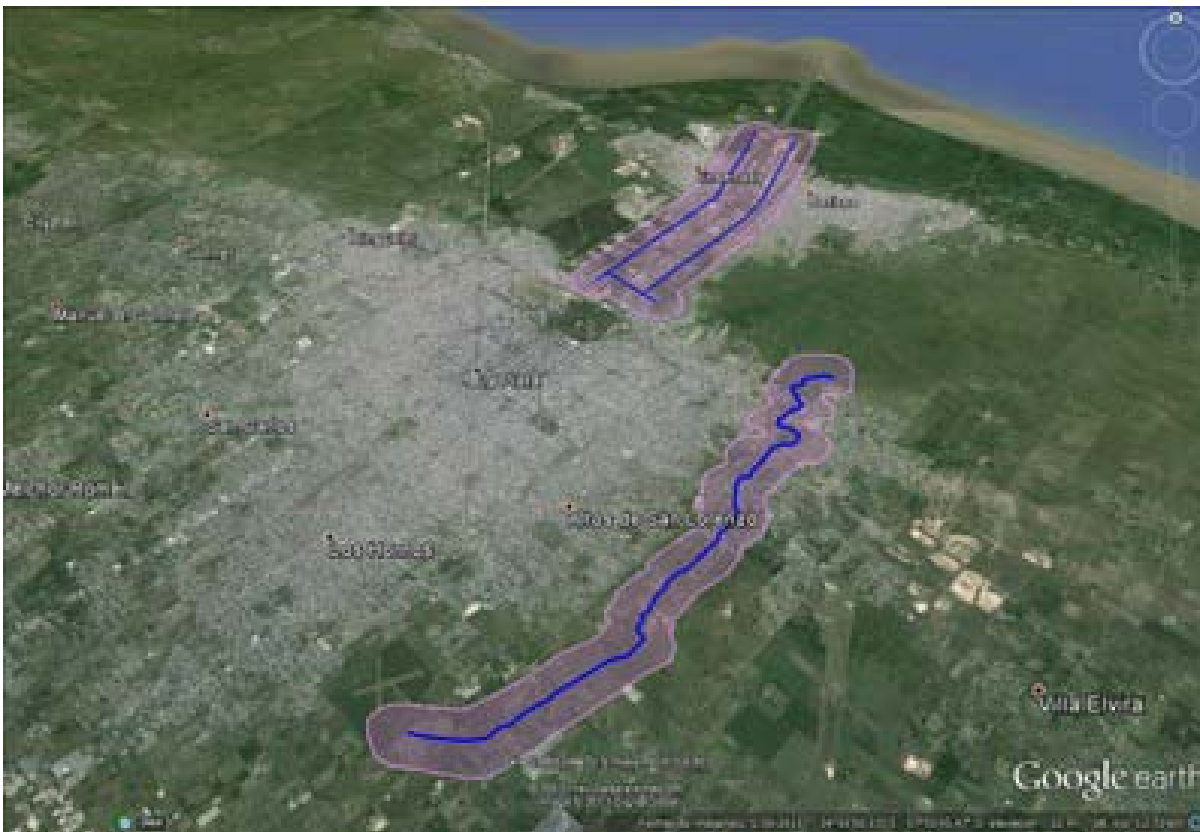

- Lagoons as sentinels of climate change
- Culturally acceptable mitigation strategies
- **Generating tools for the evaluation of climate change and health conditions as a means of reducing poverty**
 - Work with Secondary Schools
 - Educational kit for periodic monitoring

Collaboration: Participation + Interaction + Diversity

Territorial Intelligence

Integral Management of the Territory

Zones affected by the floods of 2013

Two phases :

1. Diagnosis

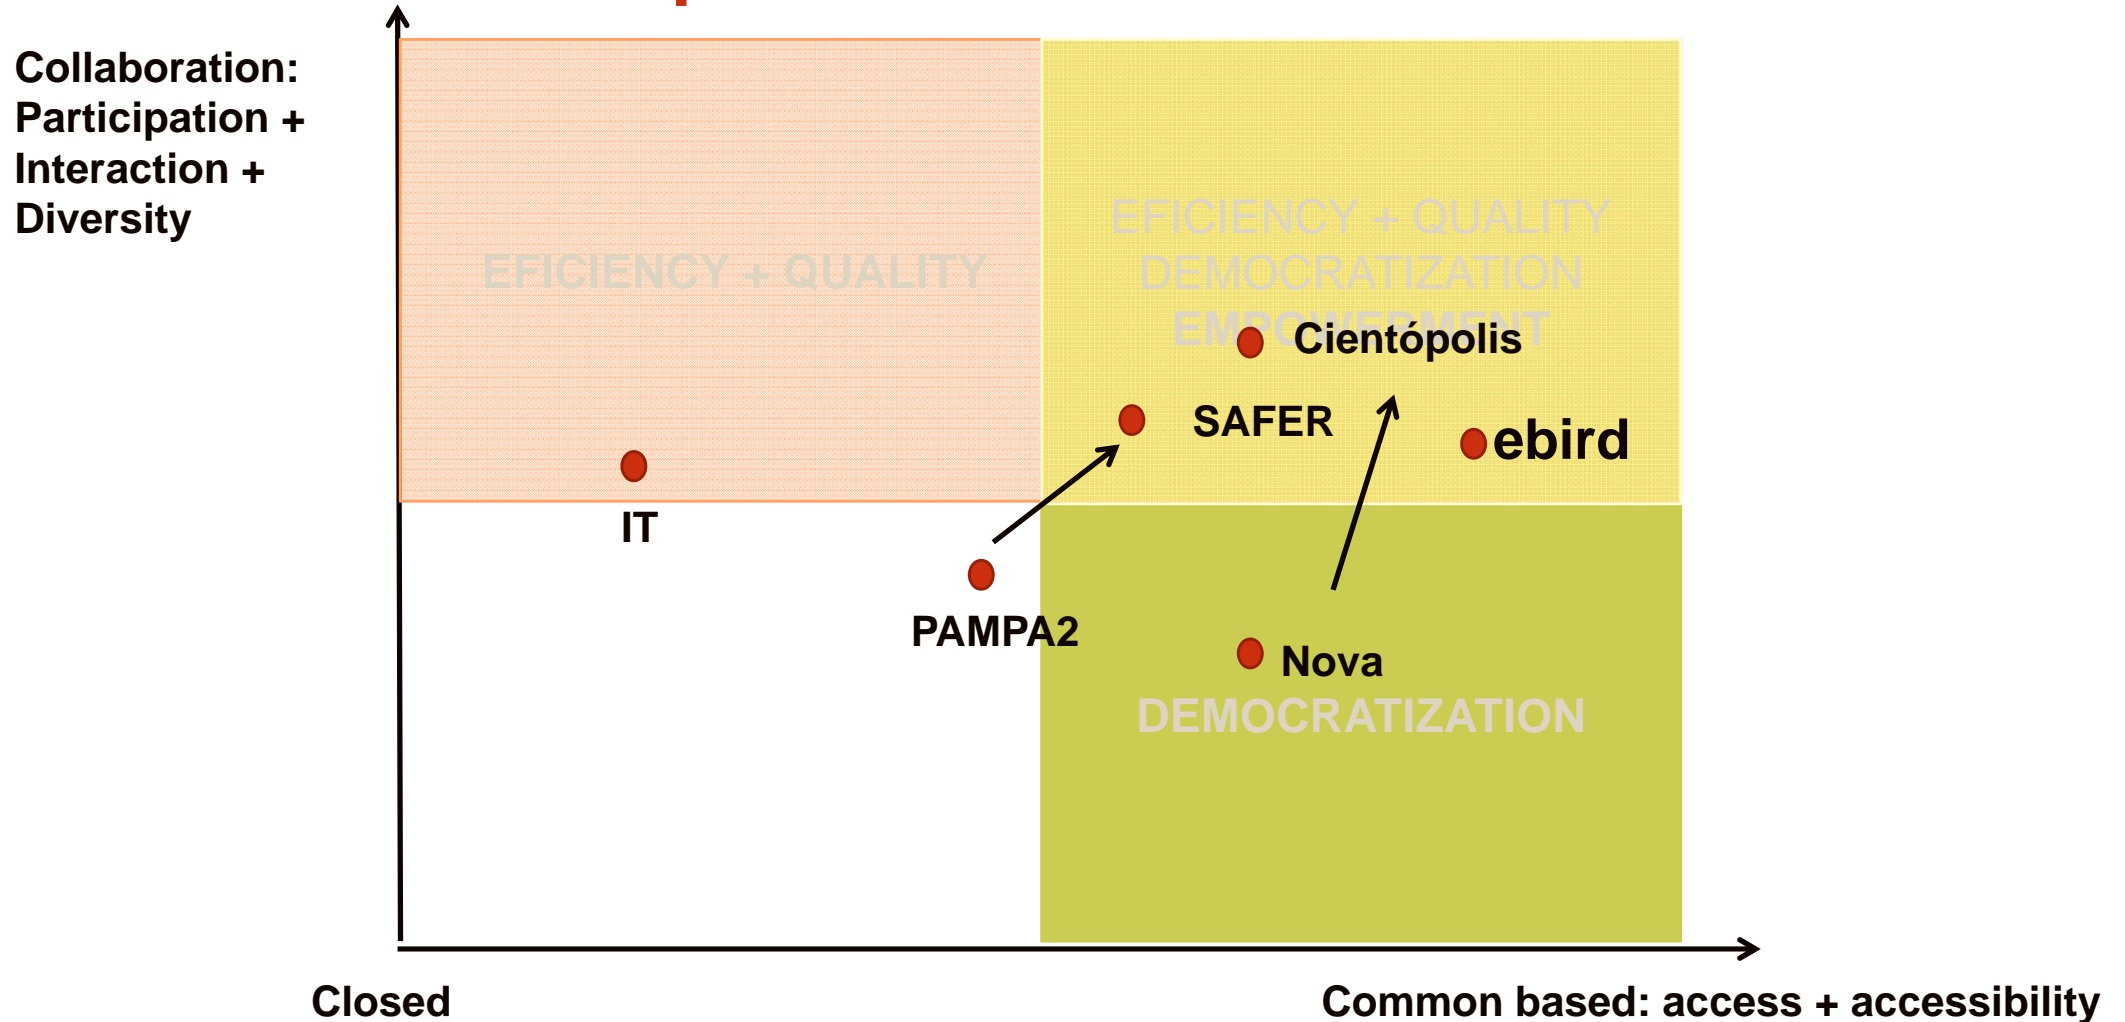

Neighbors participate: questionnaire design and water samples

2. Implementing solutions

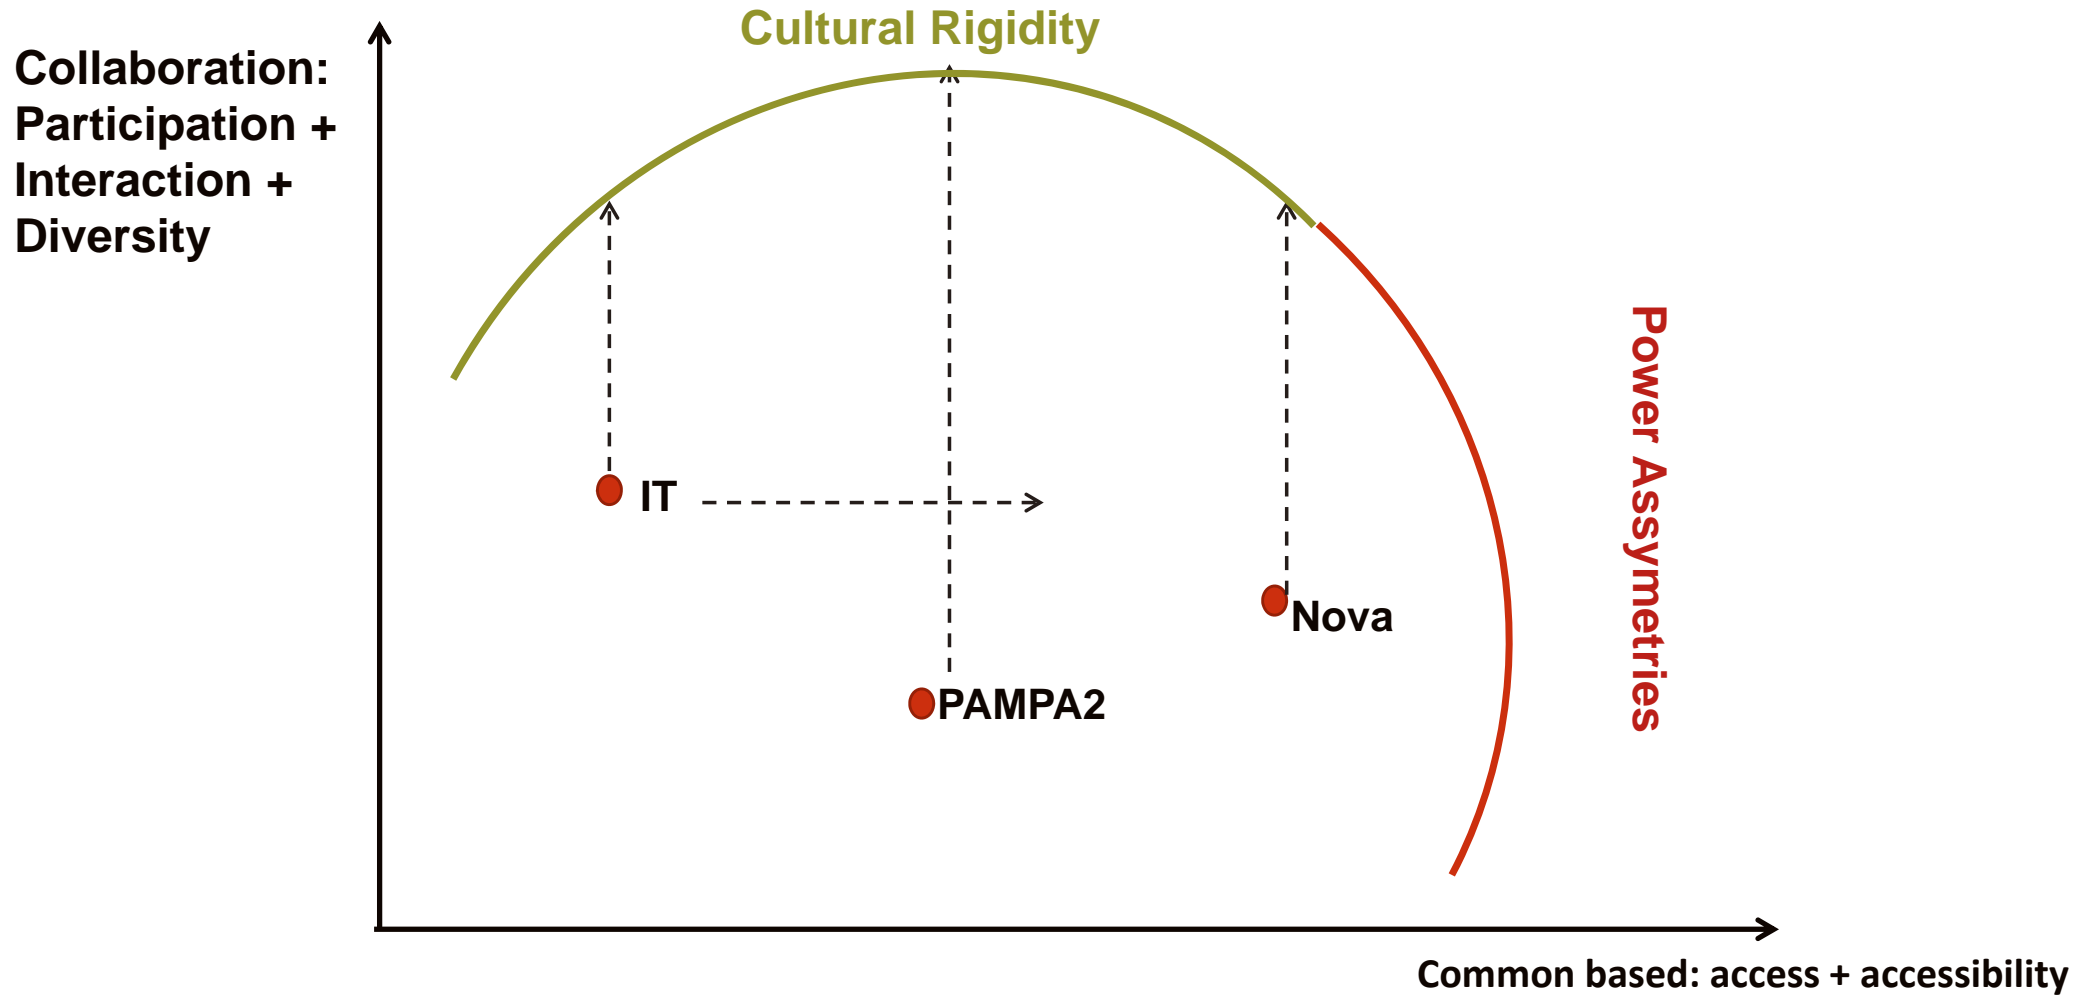

Collaboration: Participation + Interaction + Diversity

Conclusion 1: Benefits are related to dimensions of openness

Conclusion 2: Opening-up on different dimensions face different challenges

CITIZEN SCIENCE

Bird watching

Semi-automatic processing of the data

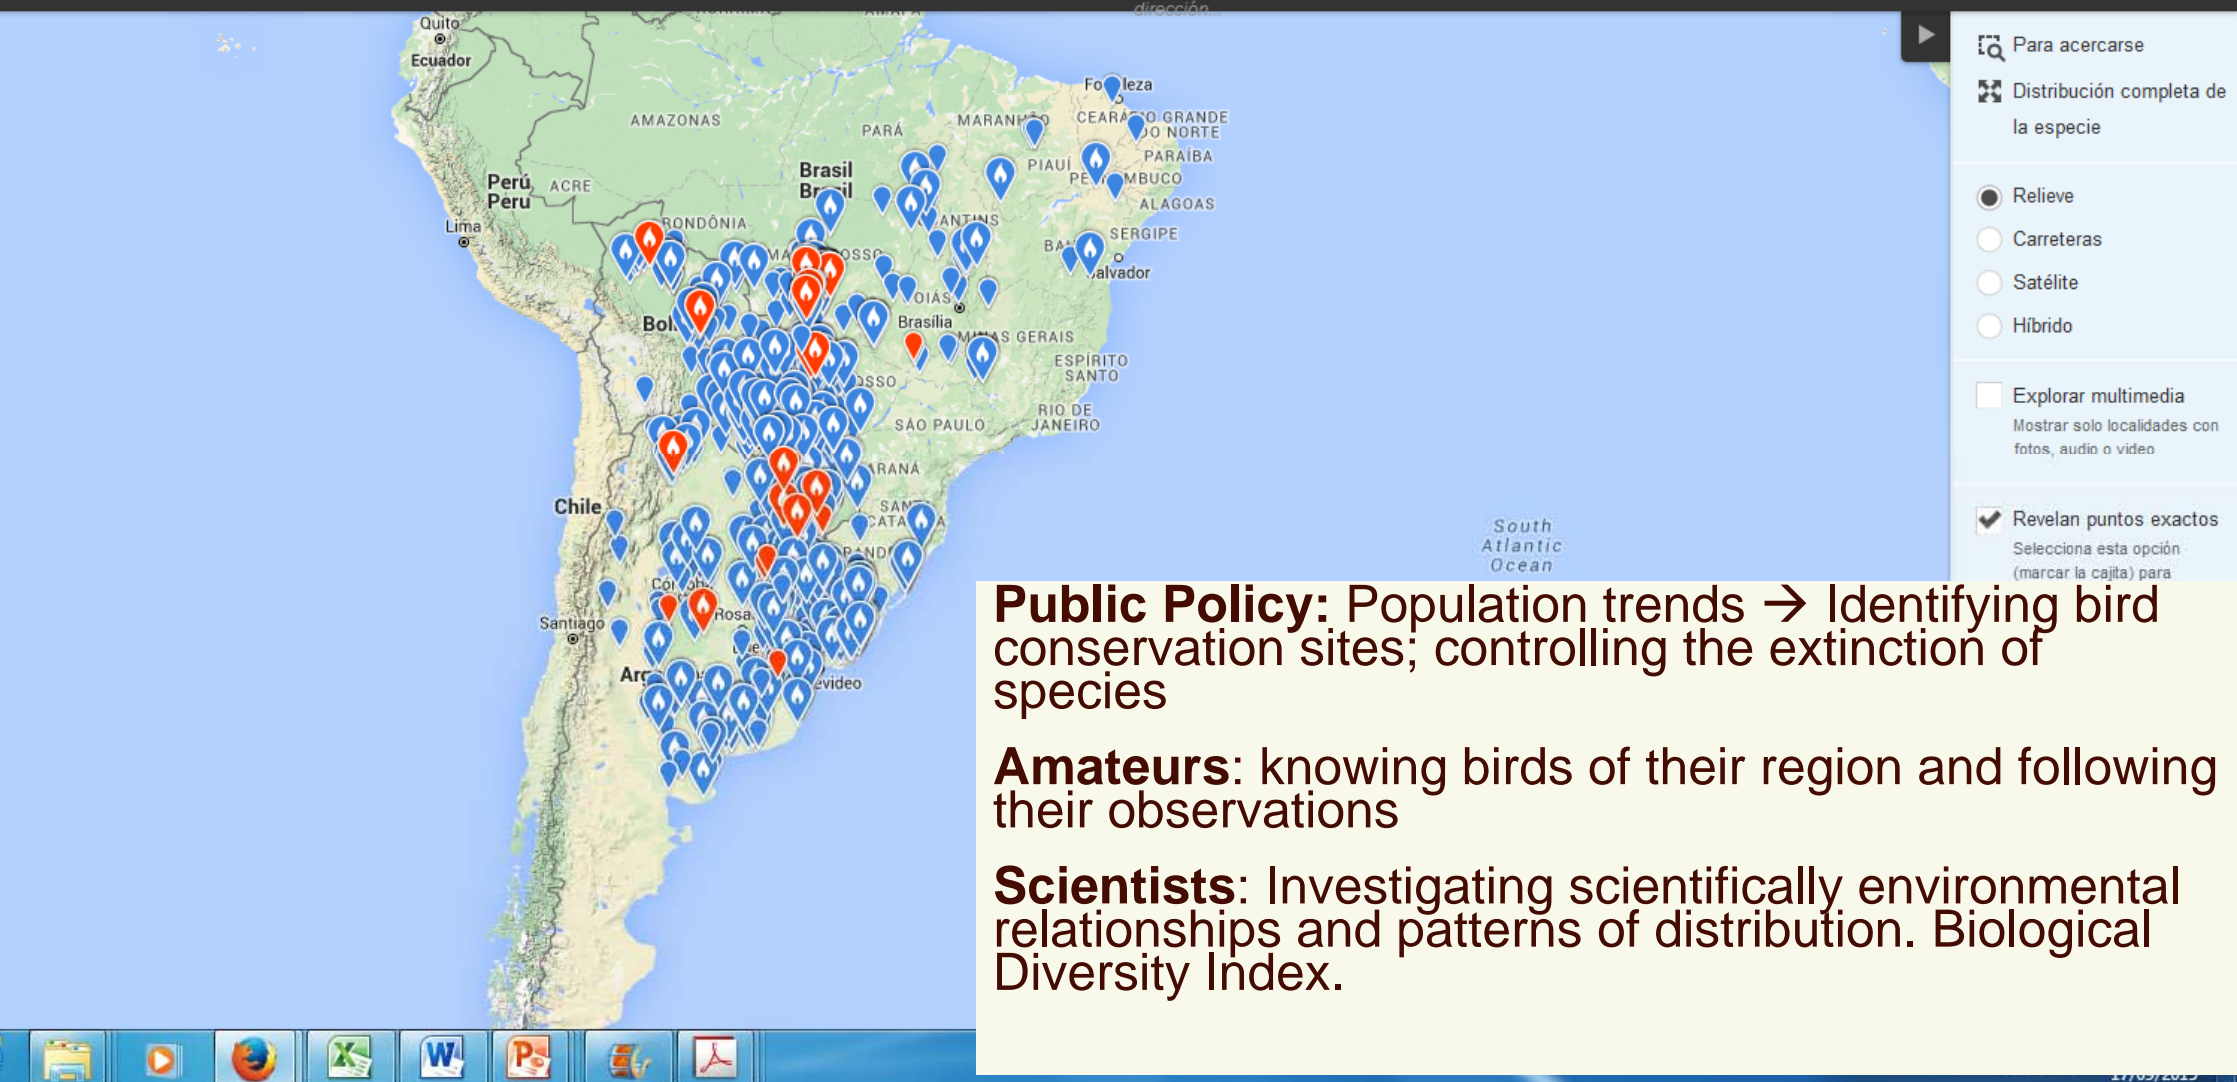

EFFICIENCY

Decreased costs / Exponential increase in observations

DEMOCRATIZATION

Platform and open data.

Q Ñandú (Rhea americana) Fecha: Todo el año, Todos los años Localidad: Ingresa el nombre del sitio o una dirección

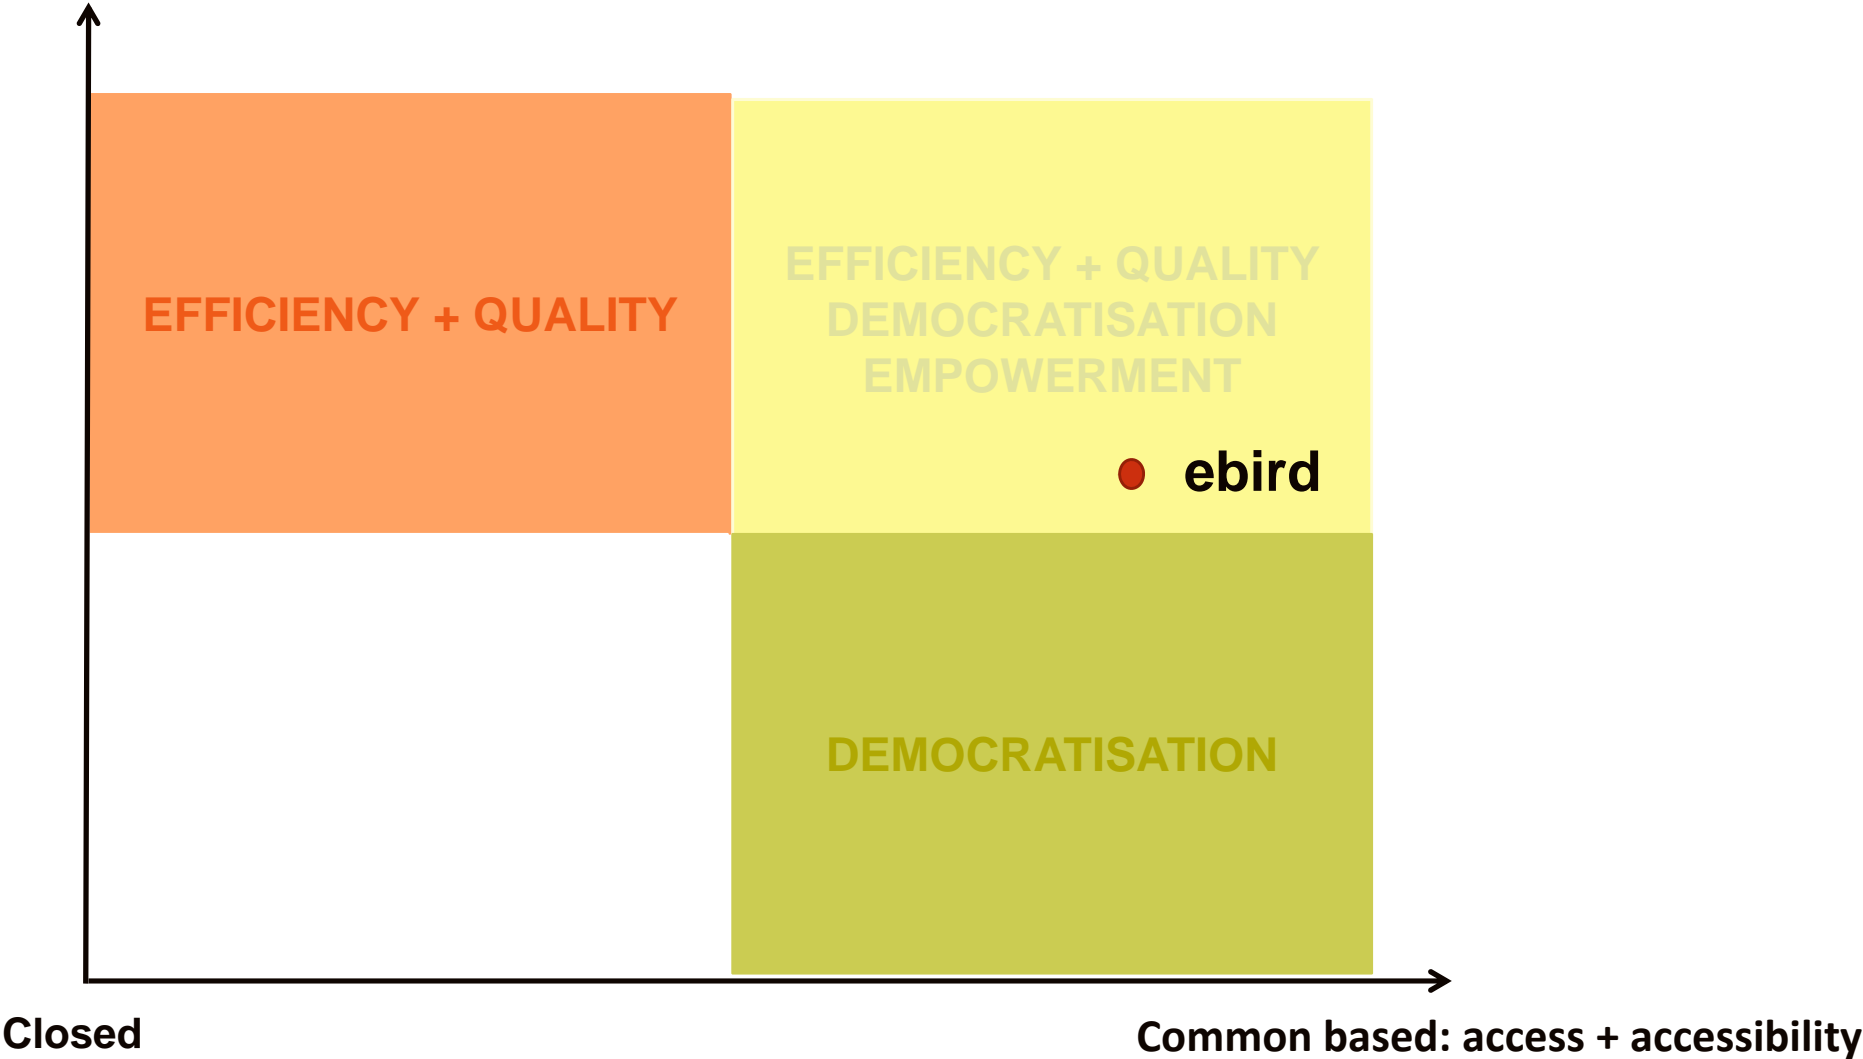

Public Policy: Population trends → Identifying bird conservation sites; controlling the extinction of species

Amateurs: knowing birds of their region and following their observations

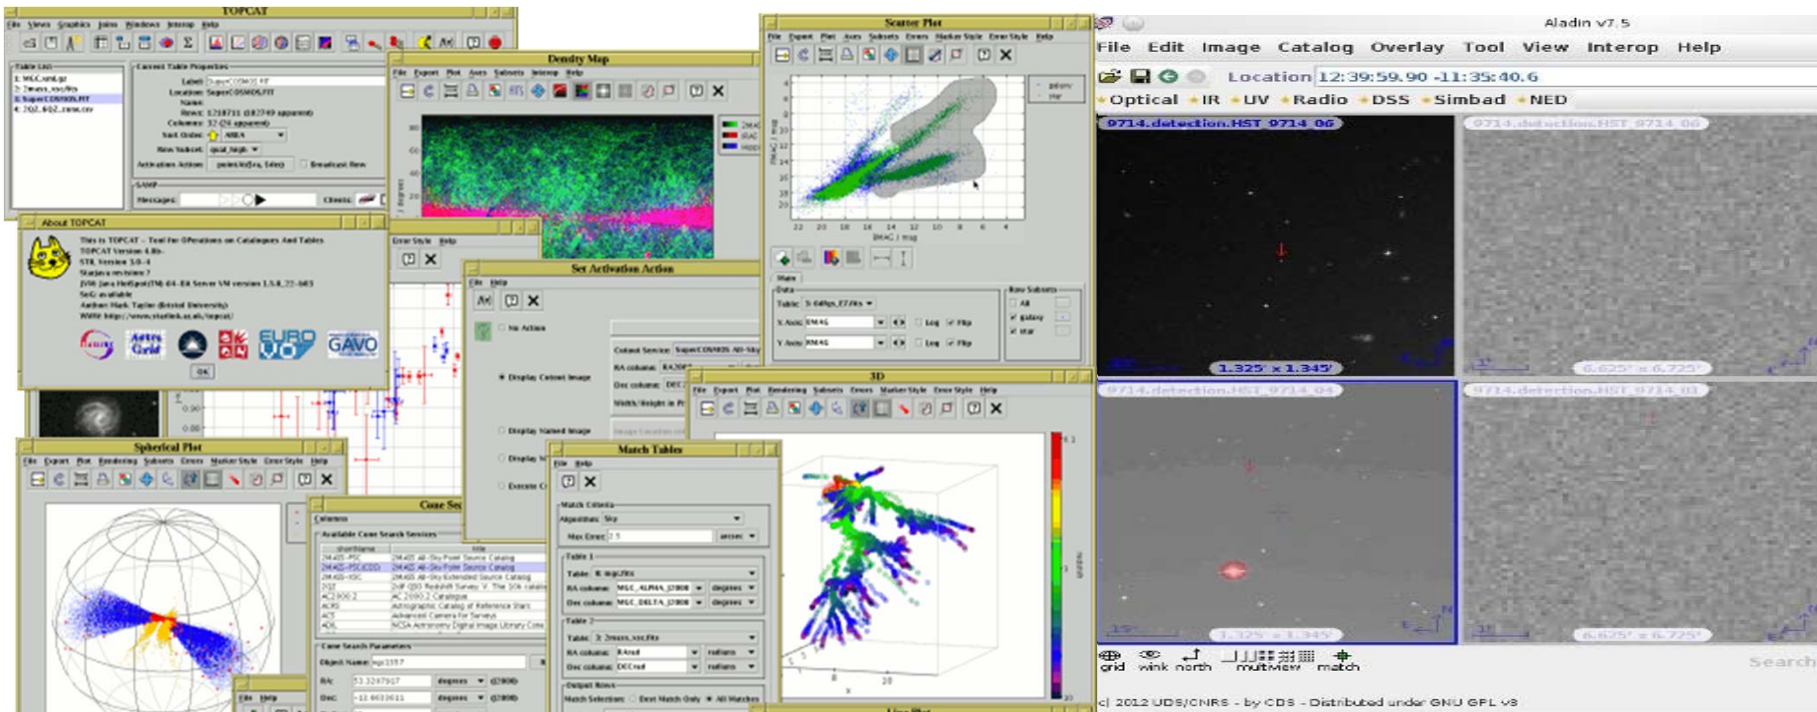

Scientists: Investigating scientifically environmental relationships and patterns of distribution. Biological Diversity Index.

Collaboration: Participation + Interaction + Diversity

Nuevo Observatorio Virtual Argentino NOVA

international
astronomical
community
**Documentation,
digitalization and
open access to
the data**

Galaxy conqueror

Runaway stars

-**Platform** for scientists to implement their projects of citizen science

- **Strengthening the link between scientific institutions and the community.**

-Encouraging citizens to participate in science

-**Galaxy Conqueror + Runaway stars:** Gaming: invite citizens to identify galaxies and runaway stars

Collaboration: Participation + Interaction + Diversity
